34% increase in stroke risk compared to other medical staff. [3]

ATHEROSCLEROSIS
Significant increase in early signs of subclinical atherosclerosis. [4]

CATARACTS
50% significant posterior subcapsular lens changes. [2]

THE HIDDEN RISKS OF RADIATION FOR MEDICAL STAFF USING C-ARMS

Reducing radiation exposure is a priority. ControlRad has the solution.

ControlRad has developed innovative solutions that dramatically reduce the lifetime risk of radiation exposure from c-arm procedures for patients and healthcare professionals without compromising on image quality or workflow.

50% reduction in radiation exposure.

RESULT: Your radiation exposure is reduced by 50-80%.

Without ControlRad
With ControlRad

Maintain image quality where it matters.
While reducing unnecessary radiation in periphery.
